Subject: RE: Anvil PFAS Qs&As

Hi Kimberly and Catherine,

Thank you for looking at the document and providing input! Currently, Tala has access to the document and I'll touch base with her today to have her review our answers and suggest any one else in OPPT that may need to chime in.

Best,

I started looking at this, and granted Thuy access for the technical information. I'm thinking we likely want to grant OPPT access as well to help address the questions as to whether these pfas species pose hazard and risk to people. Thanks, Rhina. I'll send you the most recent data file also.

Kimberly

Hi Catherine,

Thank you so much for your input! I am granting access to Kimberly and Michael right now so they can access the document.

I took a first run at some of these - probably could be simplified, but it will hopefully provide a starting point. Can we also grant access to BEAD for input (Kimberly Nesci) and Mike Bellot?

We don't have an exact timeline just yet. Alex is meeting with the other AAs tomorrow so we will have a better idea then of how quickly these comms materials need to be developed.

For a lot of these questions we won't have the answer just yet (EPA's next steps) but I'm hoping we can have some of the PFAS/container/Anvil questions answered by Friday!

Happy new year to you, too!

Happy to help. What is your timeline for this?

Hi Catherine,

Hope you are doing well and had a great start to the new year! I am working on some Qs&As regarding the Anvil PFAS issue given that we will most likely need to draft a press release in the very near future. I need a point of contact for background and to check my answers for accuracy. Would you be able to help with developing and editing these Qs&As?
